

111 Winston Way
Pasadena California
March 30 - 32.

Dear Friend Paul:

Well Paul It seems that we've run into all sorts of hard luck in getting your puppy to you. First the pup had a cough (that has spread all over L. Caly its called Kennel Distemper, its not fatal like the other real distemper but they have an awful cough. Its like a bad case of bronchitis. Tippy has it awfully bad. Then I called up the express Co. They said I would have to have the dog examined by a dog doctor & get a certificate as for its health, then I would have to have the pup vaccinated against Rabies. Arizona is among 8 states that require all this Red Tape on account of cattle. So Paul all in all your dog would cost you about 12 or 15⁰⁰ all told and thats too much for you to have to pay because your dollars are too hard earned & money is not so plentiful with you so I would suggest that you forget about the pup and then if at any time you come in at all & Tippy have any pups you see will get one. If she doesnt have

any at the time, the Kennell man that had dogs near us here will give me one I'm sure for you. I went down to Dr. Bell on East Colo St + he explained it all to me + what had to be done. Don't think Paul I don't want to to have it, because I sure do, but I'm thinking about your purse + I know you can't afford that. We would have liked to help out on all this expense but you know how things are with us.

Thanks ever so much for that interesting cowboy folder. I've never seen a real rodeo + I bet they are thrilling.

John Newport is building two auto camp trailers. Gee its so big behind a machine it looks like a box car.

Will Paul please use the pencil but I could write faster with it + the mail man is due here any minute so I'll do what ever you say about the pup. Well close + hope to hear from you soon again.

Sincerely
 Edythe Kentfield
